Application Letter

Dear Sir/ Madam,

I am writing to you today, hoping to briefly introduce myself and demonstrate my capabilities and achievements within the ever growing and demanding sector of Computer Science. I have finished my bachelor degree in computer science from Gujarat University, India. My course has focused on a variety of specialist subjects such as HTML5, CSS3, JavaScript, PHP, Java, Software engineering, creating Database Systems, Networking, etc.

These have assisted me in broadening my knowledge while showing me the diverse side of Computer Science that I find fascinating. I have gained further experience aside from my studies, through the internships, tuitions programs. I have worked as IT Manager at SAOA and currently working as English and Computer Trainer at MOT. I rapidly adapted to the new work culture and team members who became trusted associates throughout my time spent there. This internships solidified my beliefs in choosing this career path for myself. I am fanatical about precision and order, enjoy problem solving and the challenges it brings with it and believe in team efforts.

I am confident that I would be an appreciated and welcome asset to your organization and I hope that you will give me the chance for the chosen position at your organization.

Kind regards,

Rahmatullah Saeedi
